Oleg G. Smeshko

UNIVERSITY IS A HUGE SCIENTIFIC AND EDUCATIVE CENTER

Saint-Petersburg University of Management and Economics Technologies (UMTE) is one of the biggest educational establishments delivering education of European level in Russia.

During the years of its existence the University gained recognition not only in Russian scientific and educational space but also abroad. Status of the University is confirmed by the positive evaluation of effectiveness of the University and its branches by the Ministry of Education and Science of Russia, inclusion of the University into the list of institutions working under research and methodological guidance of the Russian Academy of Sciences, awarding the status of «Academic University». Academic focus of the University is emphasized by the membership in the European Academy of Sciences and Arts, International Association of Universities and other international organizations.

Bachelor's, Master's and Ph.D studies are conducted at Saint-Petersburg University of Management Technologies and Economics. UMTE students have an opportunity to study abroad at one of the partner universities.

Thanks to the effective system of continuous education (pre-university, university and post-graduate education as additional training) innovative scientific and educational complex was created at Saint-Petersburg University of Management Technologies and Economics.

The University implies advanced teaching technologies and has a large variety of training programs.

100 training programs

70 computer classes

430 members of the Academy,
doctors of sciences,
and candidates of sciences

20 000 students

80 agreement of international
cooperation

In accordance with the results of annual monitoring of efficiency of the higher education institutions carried out by the Ministry of Education and Science of the Russian Federation UMTE and its branches received the highest mark. On numerous occasions the University received the following rewards: «The best higher education institution of Russia», «100 best higher education institutions of Russia», «Hundred best goods» , «European Quality» medal and others.

The University prepares highly qualified specialists not only in the field of management and economics but also lawyers, psychologists, language experts, social workers, PR specialists. There are more than 100 training programs and specializations in total.

The main goal of the University is training of high qualified professionals of State and Municipal administration for different sectors of domestic economy with emphasis on management skills, combination of theoretical knowledge with practice, involvement of the students into real processes that take place in the job market, in society, in science and in economy of the country.

Alongside with fundamental scientific knowledge and practical experience students receive management related disciplines. This kind of approach guarantees future graduates wide opportunities for implementation of the received knowledge and practical experience in their future career.

Today the University is a recognized leader among higher educational institutions specialized in economics in Russia and has a strong reputation abroad. The University focuses on the integration in the international educational system. The University has 10 regional branches, preparing specialists for all sectors of domestic economy in all regions of the country.

CONTINUOUS EDUCATION

SECONDARY PROFESSIONAL EDUCATION –

training in accordance with the programs of Secondary professional education is conducted by College. Training in College allows not only to acquire a demanded profession with the use of educational programs with emphasis on practice but also to provide smooth transition from secondary professional education to the higher education.

HIGHER EDUCATION –

today's training of Bachelors and Masters is conducted at 14 departments on more than 800 disciplines. Educational programs are carried out by the Institutes: Institute of Economics, Management and Information Technologies, Institute of Humanitarian and Social Sciences, Institute of Law, Institute of International programs, Institute of E-learning.

ADDITIONAL EDUCATION –

programs of additional education at the University are implemented by the Institute of additional education: MBA, Presidential program of management training for the organizations of the national economy of the Russian Federation and also long-term and short-term programs of retraining and professional development.

ACADEMIC MOBILITY

It is very important for the modern specialist to be competitive not only in his/her city or country, but also on the international level. Education without language barriers and local restrictions leads to employment without borders.

Saint-Petersburg University of Management Technologies and Economics is directly included in the European and world educational process. University teachers and Ph. D. students have an opportunity to give lectures at higher education institutions of Europe and the world, the international cooperation of UMTE covers more than 80 educational institutions in the USA, Great Britain, Germany, Italy, the Netherlands, Spain, Finland, France and other countries.

UMTE students have an opportunity to do their exchange semester at one of the foreign partner institutions abroad. Students also can become participants of winter and summer language and/or business schools. Study educational tours are organized by the University several times per year, during such tours students can get acquainted with the culture and sights of the country they are interested in. Training abroad not only improves languages skills, but also expands professional outlook and allows to use international experience in the future business career. For this reason popularity of Double Degree programs at UMTE grows every year.

Foreign scientists and professors of the leading higher education institutions of Europe and the USA, representatives of business are attracted for ensuring educational process directly in St. Petersburg. They give lectures at UMTE, as well as the practical training.

INSTITUTE OF INTERNATIONAL PROGRAMS

UMTE International activities are oriented to the integration to the international science and educational fields, with the aim to increase the international prestige of the University, training world-class personnel in management and economics.

The University has actively developed international relations. The mission of the Institute is the development of international cooperation of the University with universities, scientific institutions and foreign companies in the field of education, research and business. Realization of this mission will allow the University to integrate into the world educational and research space.

MAIN DIRECTIONS OF THE INSTITUTE'S WORK:

- Development and implementation of the international projects and joint educational programs with the partner universities;
- Attraction of foreign students to UMTE and organization of training programs for foreign students at UMTE in all areas and profiles;
- Development of academic mobility programs for students and teachers of the University;
- Participation in conferences, forums, sessions and programs of foreign universities, joint scientific projects and initiatives;
- Designing educational programs in accordance with the Institute's profile, expanding their range from the perspective of competitiveness.

...

The Chair has laboratory, where students of all specialties can study certified training programs and standard application solutions of the 1C company are carried out.

Students repeatedly became winners of regional, all-Russian, international contests and Olympiads, were awarded with diplomas and marks of distinction, they won grants.

The Institute has developed and at the moment is successfully implementing a Double Degree program that allows students to receive two degrees: a degree of UMTE and a degree of a foreign partner university. All students can get a Diploma Supplement, which follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES.

STUDENT'S LIFE

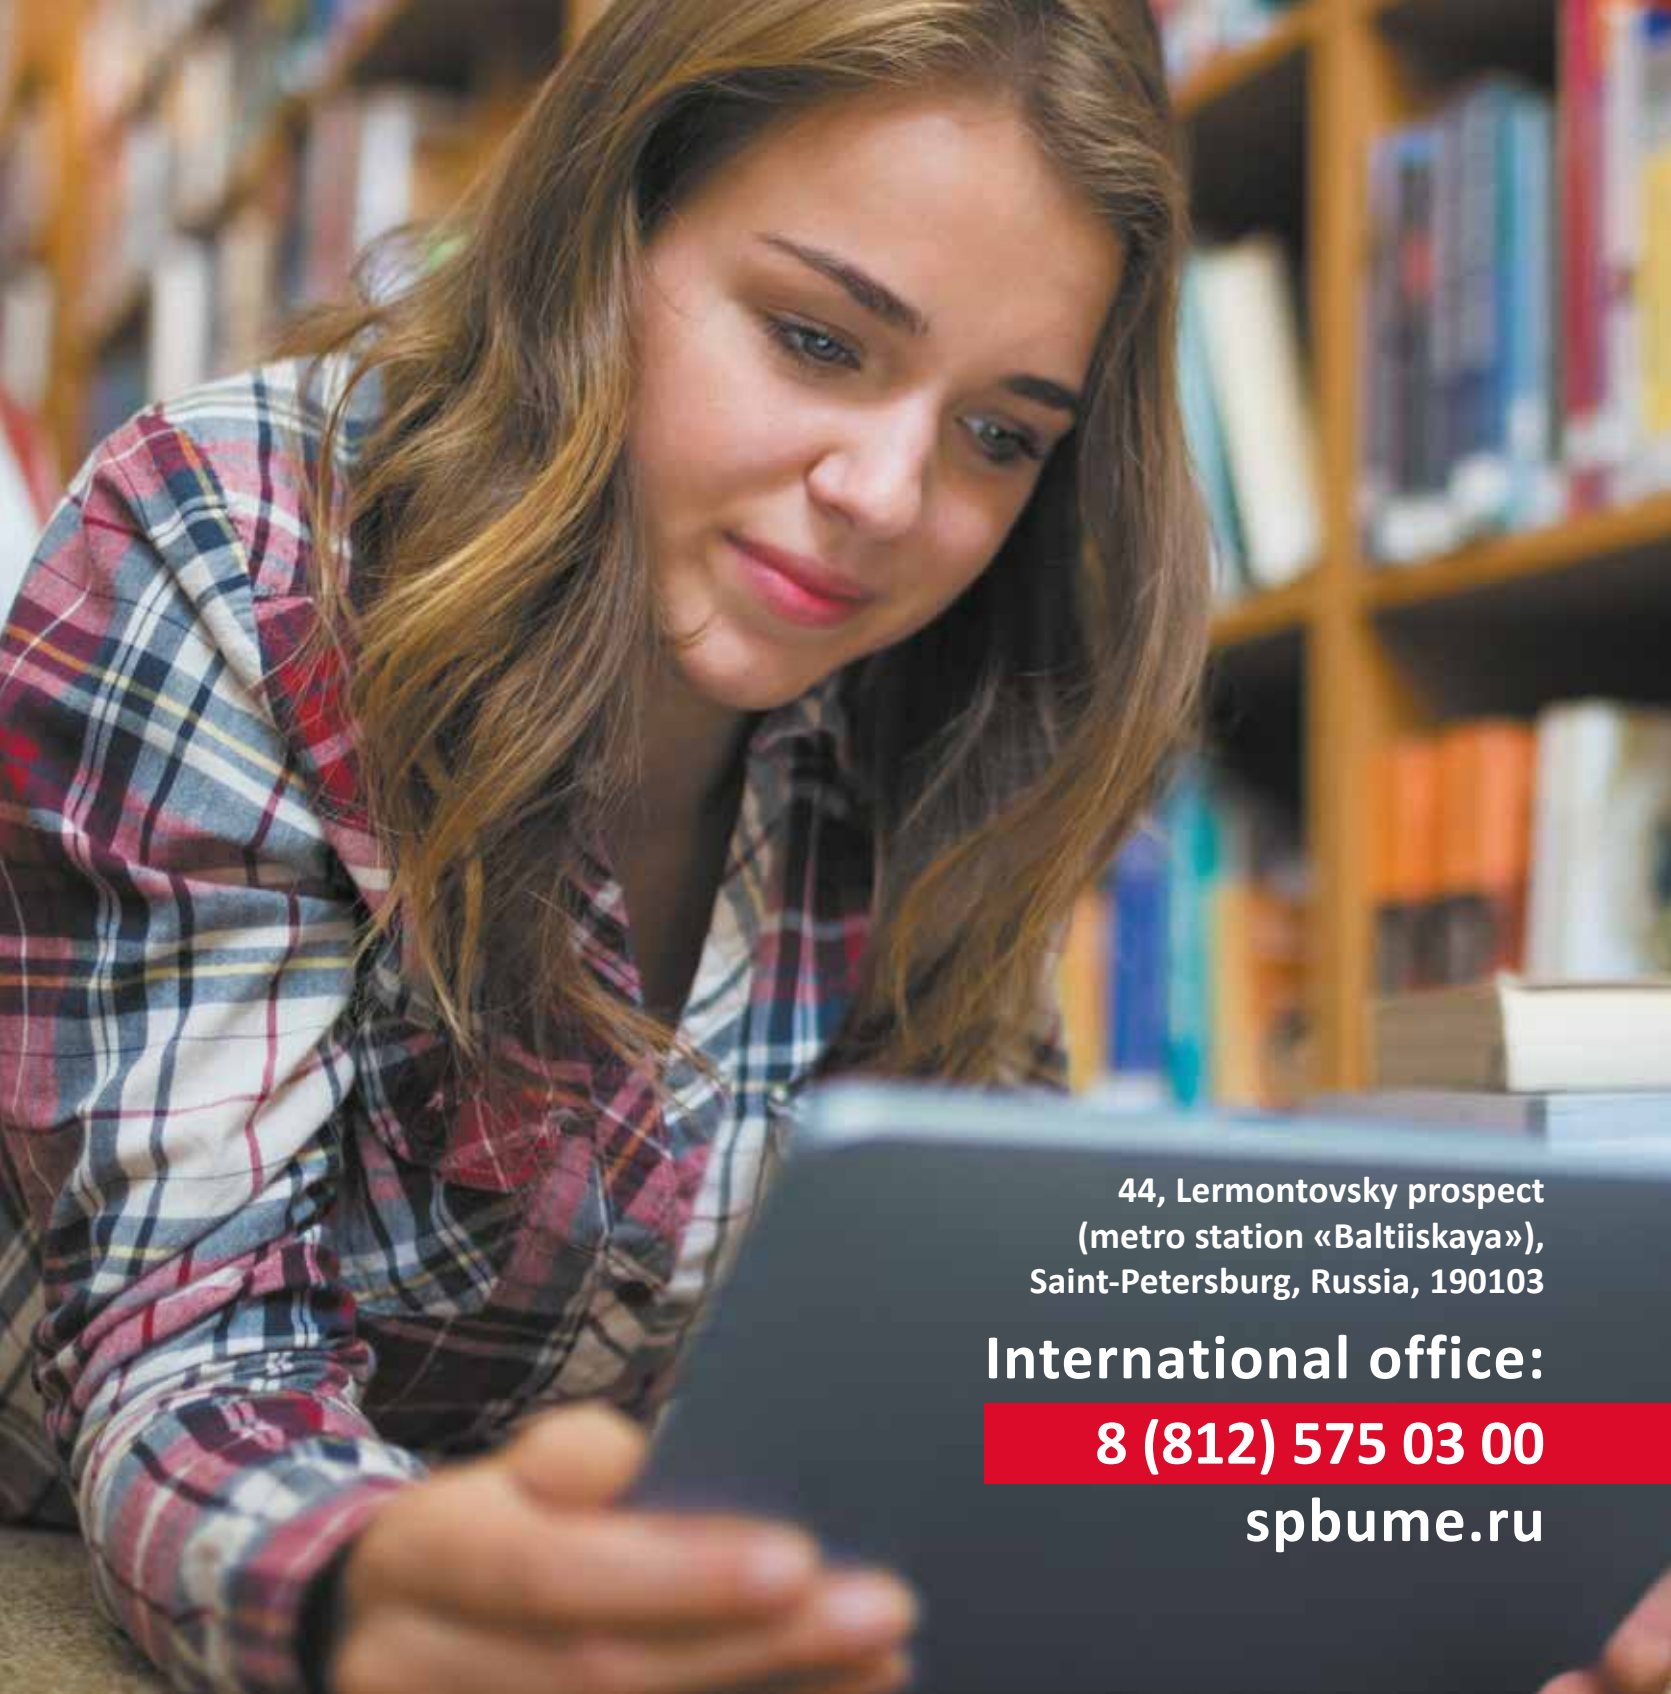

Student years are the most memorable in the life of any person. Tense studies combine at this time with active and varied rest. At UMTE, all conditions are settled for this purpose. Active civil position is also a well-established student tradition of the University. Students actively work in public movements; take part in city and intercollegiate projects. Every year on the eve of the Victory Day and the Day of the Defender of the Fatherland, students' deserts are sent with concerts to the city hospitals, laying wreaths at the memorials of the Great Patriotic War. Among the students of the University there are many talented young people who can sing, dance, read poems and confidently keep themselves on stage.

For the children to show their creative potential, UMTE annually organizes various competitions. The traditional became «Miss first-year student» and «Mr. first-year student», where yesterday's entrants can not only demonstrate their talents, but also quickly join the life of the many thousands of students.

A good tradition was the initiation into the first-year students and the awarding of diplomas to the best graduates in the landmarks of St. Petersburg, closely related to Russian history and the formation of Russian statehood, including the Mariinsky, Tavrichesky, Konstantinovsky, Kamennooostrovsky and Yusupov palaces; Smolny, the Russian Academy of Sciences, the House of Scientists, the Mikhailovsky Castle and many others.
